Editor-in-Chief: R. Rott

Springer International

Founded in 1886 by Robert Koch, C. Flügge, F. Neufeld,
M. Hahn, R. Doerr, H. Dold, R. Otto, H. Schlossberger etc.
as Zeitschrift für Hygiene und Infektionskrankheiten.
Vols. 148 to 151 were published under the title:
Zeitschrift für Hygiene und Infektionskrankheiten,
Medizinische Mikrobiologie, Immunologie und Virologie.
From Vol. 152 to 156 the title was:
Zeitschrift für Medizinische Mikrobiologie und Immunologie.
Vols. 1–90 (1920) Leipzig, Veit & Co.,
later Berlin, Vereinigung wissenschaftlicher Verleger Walter de Gruyter & Co.,
from Vol. 91 on Berlin, Springer.

The exclusive copyright for all languages and countries, including the right for photomechanical and any other reproductions, also in microform, is transferred to the publisher.

The use of registered names, trademarks, etc. in this publication does not imply, even in the absence of a specific statement, that such names are exempt from the relevant protective laws and regulations and therefore, free for general use.

Notes on Preparation of Illustrations

Selection of illustration material: In order to obtain the best results in reproduction, to avoid delays during production and hence unnecessary costs, we ask authors to note the following points when selecting and preparing illustration copy.

1. Half-tones (photographs, photomicrographs, X-rays, instrument traces etc.)

- Send only good, well-contrasted glossy prints of the original negative; prints should be trimmed at right angles; send contact copies of X-rays — if these are not available, the actual X-ray films.
- Mark or trim off marginal portions which are not required (at right angles, please).
- State scale of reduction, if any, with due allowance for the format of the printed page (print area).
- Group figures into whole-page plates; see that they match in the proposed scale of reduction.
- With X-rays, in particular, mark the significant portions on the back of the copy, or on a cover sheet.
- Enter inscriptions, marker lines etc. neatly and in the appropriate size, either on the photograph itself or on a cover sheet.

2. Line drawings

- State final size of illustration, with due allowance for print area.
- The ideal is for drawings to be twice the final size and executed in indelible black ink.

  Important points to note: thickness of lines, size of inscriptions, size of measuring points, adequate spacing of shaded and dotted areas.

  Words should be in upper and lower case characters (not block capitals).

Example showing the effect of reduction $\times\ ^1/_2$.
